

New From Testex

Testex Digital Gage

The Testex digital gage simplifies the process of recording and storing replica tape profiles. With the push of a button an inspector can record time, date, measurement sequence number and profile height. At the end of a work day, the measurements can be uploaded to a spreadsheet on the inspector's laptop or office computer.

- Bias offset permits automatic subtraction of tape substrate
- Selectable English (mil) or Metric (μm) units
- Record time and measurement with the press of a button
- Upload measurements via USB to a spreadsheet at end of day
- No special software required
- Anvil size, closing force, operation, etc. matched to Testex dial gage
- Intuitive design
